

Have heart disease, diabetes and/or obesity and want to feel and function better?

A MEDICAL/LIFESTYLE PROGRAM TO HELP PEOPLE WITH HEART DISEASE, DIABETES AND/OR OBESITY FEEL

- If your once-good health has changed to include heart disease, diabetes, and/or obesity there is hope that you can feel and function better.
- The body's innate ability to heal itself can be restored when factors blocking healing are removed.
- Depression or low moods that can accompany heart disease, diabetes and obesity often improve with health-minded approaches.
- Physician-supervised reduction of pharmaceutical drugs on an individual basis can improve quality of life by reducing toxicity and symptoms from side effects.
